NucleoSpin® TriPrep

Parallel isolation of DNA, RNA and proteins from undivided samples

This kit gives three results from one sample and allows the determination of gene expression profiles from a large variety of sample materials, covering cultured cells, tissue, bacteria, yeast and plants.

- Convenient, one-column preparation of RNA, DNA and protein
- High quality RNA and DNA, ready-to-use for downstream applications
- High protein yield independent of protein size, localization, modification, etc.
- Complete kit includes: NucleoSpin® filters (shredders) for optimal lysis, rDNase for on-column DNA digestion and Protein Solving Buffer for solving all types of proteins
