

Keep your Lab Mycoplasma-Free!

Buy 4 PromoKine microbial detection, elimination and prevention products from MJS BioLynx Inc. and get the 5th one FREE.

Mycoplasmas are a frequent source of contamination in cell cultures and they affect cellular processes such as metabolism, growth, transfection, protein synthesis, cytokine secretion and signal transduction. They even cause damage to DNA and RNA.

To help resolve this problem, PromoKine has developed PCR-based mycoplasma testing kits, as well as products for the effective elimination and prevention of mycoplasma contamination.

*Offer valid until **January 31st, 2012.***

*Please reference **promotion code PK3/11** at time of order.*
